

NARCISSORUM NOTULÆ, VIII

Francisco Javier FERNÁNDEZ CASAS

FONTQUERIA 55(54): 443-444 [seorsim 1-2]
MADRID, 17-III-2007

FONTQUERIA is a series of botanical publications without administrative affiliation. It publishes original works in Botany, particularly those that are of interest to the editors. Its publications are in any language, the only limitation being the ability of the editorial team.

Accredited with the *International Association for Plant Taxonomy* for the purpose of registration or new non-fungal plant names.

PRODUCTION

Database consultant: Guillermo GONZÁLEZ GARCÍA
Typesetting: Ambrosio VALTAJEROS POBAR, Ulpiano SOUTO MANDELOS

Narcissorum notul , VIII

Francisco Javier FERN NDEZ CASAS
Real Jard n Bot nico, CSIC. Plaza de Murillo, 2. E-28014 Madrid

Most of this paper was prepared within project PB96-0841, of the DGICYT; its publication was much delayed.

FERN NDEZ CASAS, F. J. (17-iii-2007). Narcissorum notul , VIII. *Fontqueria* 55(54): 443-444 [seorsim 1-2].

Keywords. Nomenclature, Taxonomy, *Narcissus* Linnaeus (*Amaryllidaceae*), Algeria.

Zusammenfassung. Aufgel ste Ammerkungen  ber die Gattung *Narcissus* Linnaeus (*Amaryllidaceae*). Eine lateinische Beschreibung wird f r *Narcissus* \times *Chevassutii* Gorenflot, Guinochet & Qu zel zusammengesetzt, die ohne so eine Anforderung ver ffentlicht worden war.

Abstract. Odd notes about the genus *Narcissus* Linnaeus (*Amaryllidaceae*). A Latin description is made of *Narcissus* \times *Chevassutii* Gorenflot, Guinochet & Qu zel, a species was been published without such requirement.

R sum . Notes disperses au sujet du genre *Narcissus* Linnaeus (*Amaryllidaceae*). Il s'arrange une description latine pour *Narcissus* \times *Chevassutii* Gorenflot, Guinochet & Qu zel, plante que avait  t  publi e sans telle condition requise.

Resumo. Notas avulsas sobre o g nero *Narcissus* Linnaeus (*Amaryllidaceae*). Uma descri o latina e composta para *Narcissus* \times *Chevassutii* Gorenflot, Guinochet & Qu zel, que tinha sido publicado sem tal exig ncia.

Resumen. Notas sueltas acerca del g nero *Narcissus* Linnaeus (*Amaryllidaceae*). Se compone una descripci n latina para *Narcissus* \times *Chevassutii* Gorenflot, Guinochet & Qu zel, que se hab a publicado horra de tal requisito.

We continue our series of homonymous notes on the genus *Narcissus* Linnaeus, materials collected with a view to writing an hypothetical monograph. We follow the publishing line initiated in preceding notes, the last of which may be seen in F. J. FERN NDEZ CASAS (2005).

Narcissus \times **Chevassutii** Gorenflot, Guinochet & Qu zel, [Bull. Soc. Hist. Nat. Afrique N. 42(6-8): 120 (1952), sine latina descriptione] ex Fern ndez Casas, *Fontqueria* 55(54): 443-444 (2007)

ut *Narcissus serotinus* Linnaeus \times *N. tazetta* Linnaeus

INDICATIO LOCOTYPICA: «dans les Marais de la Rassauta,   l'Est d'Alger»

TYPUS: *M. Chevassut*, *R. Gorenflot*, *M. Guinochet* & *P. A. Qu zel s/n*, 10-XI-1951 (AL)

DISTR. GEOGR.: tabula nostra 1 (pag. 444).

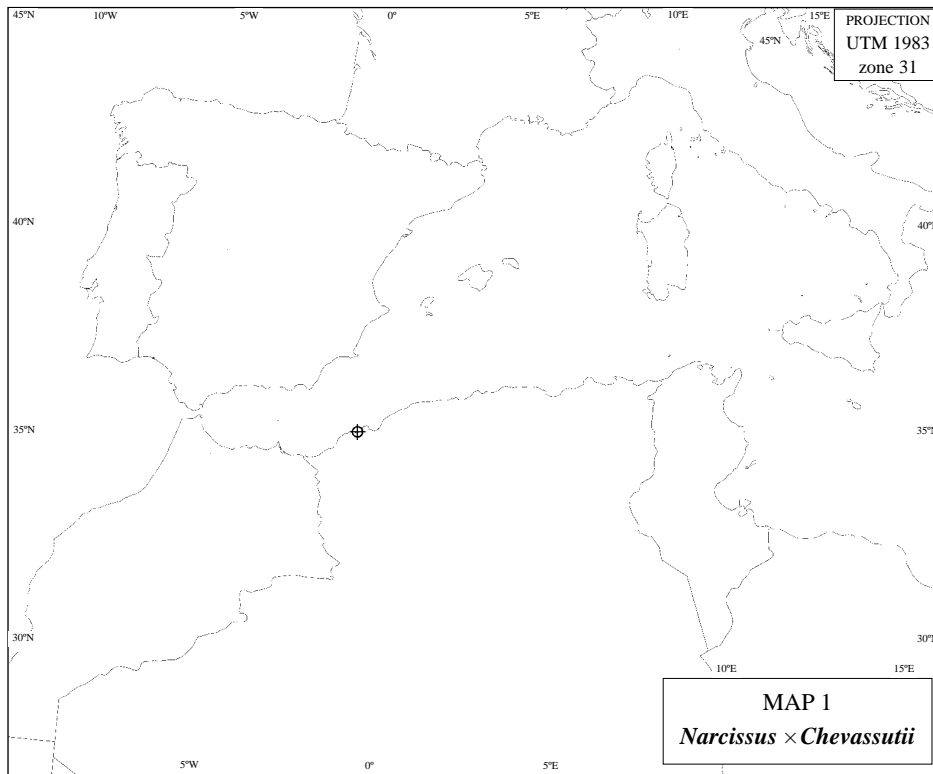

OBSERVATIONS

This hybrid species was proposed by its authors with a very enough and diagnostic description in French language, but without Latin diagnosis. We add a Latin translation of the original description next, to fulfill the formal requirement of the International Code of Botanical Nomenclature.

This bastard is only known at the moment of its classic locality, cf. R. GORENFLOT & AL. (1954).

DESCRIPTIO LATINA ex illa quam R. GORENFLOT, M. GUINOCHET & P. A. QU ZEL (1954: 120) in gallica lingua scripserunt translata

Herba glauca, inodora. **BULBUS** florendi tempore avellan e magnitudine. *Collum* basalis ut in *N. tazetta* instructo. **FOLIUM** florendi tempore unicum, filiforme, intus canaliculatum, extus laeve, 10-18 \times 0,3 cm. **SCAPUS** gracilis, non canaliculatus, folias

parum superantis, 15-20 cm. INFLORESCENTIÆ 2-8 floriferæ. *Spatha* lanceolata, ubique membranacea, florendi tempore 2,5-3 cm, ad basim longe tubulosa. *Pedunculi* brevi, 1-4 cm. *Tubus perianthicus* conicus, 1,5-1,7 cm, ad basim 2 mm, ad apicem 4 mm diametians, *Tepala* vix reflexa, illas *N. Tazetta* subsp. *Bertolonii* simillima, obovata, 1,5-1,8 × 0,8-1,2 cm; luteo aurantiaca, cupuliformia, integra, 0,7 cm in promedio diametentia. *Stamina* suprema margo superiore coronæ subattingentia.

REGARDING THE ETYMOLOGY AND ORTHOEPY of the specific name

The specific name *Chevassutii* is dedicated to Georges CHEVASSUT, one of the collectors of the type specimen. The name is proparoxytone, stressed in the antepenultimate syllable, Chevassútii.

EXAMINED SPECIMENS

ALGERIA, (01) ALGER:

30SYE15 35.74°, -000.63°; Oran, 35°41'36"N, 000°41'02"W; «la Rassauta: à l'est d'Alger, dans les marais», *M. Chevassut, R. Gorenflot, M. Guinochet & P. A. Quézel s/n*, 10-XI-1951 (AL; typus *N. x Chevassutii*), R. GORENFLOT, M. GUINOCHET & P. A. QUÉZEL (1952: 120).
